National Recycling Week

Since the campaign was established in 1996, it has been held every year during the second week of November. This year, National Recycling Week will be from Monday 7th – Sunday 13th November, 2022 with this year's theme 'Waste is not waste until it's wasted'.

We encourage everyone to brush up on their [#recycling](#) knowledge, review current initiatives and look for ways to [#change](#) and improve behaviours at home and in the workplace. This simple act can make a huge impact in reducing contamination in recycling bins and minimising [#waste](#) currently going to landfill. This will result in the capturing of more valuable resources.

Let's work [#together](#) to [#inspire](#) behaviour [#change](#) by sharing our knowledge and good recycling practices. You can check your local council website for information on what can and can't be recycled in your municipality. Remember to re-use what you can and recycle correctly and effectively to [#help](#) play your part in making a [#difference](#).
